RE: Revocation of Director's Instructions
1063 and 1091 Monaghan Road, Peterborough, ON

The Ministry of the Environment, Conservation and Parks has received your request to revoke the Director's Instructions issued to General Electric on June 21, 1995, for the establishment and operation of an interim PCB Waste Management Site located on a property with two municipal addresses, 1063 and 1091 Monaghan Road, Peterborough, ON and with the following Property Identified Number: 28067-0046.

On June 21, 1995, revised Director's Instructions were issued to General Electric Canada Inc. for the establishment and operation of an interim PCB Waste Management Site at the Monaghan Road Site. These Instruction's included the requirement for a ground and surface water monitoring program. The June 21, 1995 Director's Instructions revised and replaced the instruction's dated November 2, 1993.

In March 2024, Director's Order Number 1-228916698 was issued to GEPR Energy Canada Inc., formerly General Electric Canada. This Order addresses the in-situ management of PCB impacted soils that have previously been managed in accordance with the Director's Instructions.

With the issuance of the Director's Order, the Director's Instructions are no longer required and revoking them will not impact the management of PCB waste at the Site. I therefore herby formally revoke the Director's Instructions dated June 21, 1995. For clarity, the Director's Instructions dated November 2, 1993, were replaced on June 21, 1995, and were thus revoked at that time.
